

congreet pricing model

The cost structure of congreet software consists of the base price of the subscription and the credits for invitations.

To be able to use all functions of congreet, you have to complete a subscription for a certain term. You will need a credit for each participant to be invited to congreet. So if you buy a package of 250 credits for invitations, you can invite 250 participants to join networking with congreet.

For example, if you are buying a quarterly subscription and want to invite a total of 200 participants, you pay $€150 + €590 = €740$.

The term of your subscription begins with the sending of the first invitation via congreet.
